CAREER OBJECTIVE

Seeking a challenging opportunity to apply and enhance strong technical skills in programming, full-stack development, and problem-solving within a dynamic and growth-oriented organization. Committed to continuous learning, quickly adapting to new technologies, and delivering quality solutions that support organizational goals and contribute meaningfully to the advancement of the industry.

ACADEMIC QUALIFICATION

Dr.N.G.P Institute Of Technology	B.TECH(CSBS)	CGPA: 8.00	2023-2027
Vailankanni Public School (CBSE)	HSC		2022-2023
Vailankanni Public School (CBSE)	SSLC		2020-2021

PROJECTS

T-Shirt Business E-Commerce Website 2026

- Developed a full-stack T-shirt customization and e-commerce platform featuring an interactive 3D design studio, enabling users to create and preview personalized apparel in real time.
- Built a secure Node.js, Express.js, and MongoDB backend with comprehensive order management, admin controls, user authentication, and production-ready digital asset handling.

Traveloop 2026

- Architected and developed a full-stack travel planning platform enabling itinerary creation, budget tracking, packing list management, and collaborative trip coordination for multiple users.
- Implemented a secure Node.js, Express.js, and MongoDB backend with JWT authentication and a dedicated admin dashboard for efficient trip and user management.

Smart Spending Analysis 2026

- Developed a Python-based Retail Credit Intelligence System leveraging a Random Forest classification model to predict loan eligibility from customer financial behavior patterns.
- Designed a Streamlit dashboard for spending risk profiling, affordability optimization, and transparent credit decision analysis with interpretable model outputs

Hostel Management System 2025

- Developed a full-stack Hostel Management System comprising 10+ functional modules, incorporating secure JWT-based authentication and role-based access control for both students and administrators.
- Engineered a responsive user interface supporting dark/light theme switching, with MongoDB cloud storage and local caching to ensure uninterrupted performance during network disruptions.

Financial Portfolio Management System 2025

- Built a Streamlit-based Zerodha Tradebook Analyzer to automate extraction, data cleaning, and structured organization of stock transaction data from Excel tradebook files.
- Integrated Supabase cloud storage with a portfolio analytics pipeline to centralize trade records and generate actionable investment performance insights.

Smart Shoe For Visually Impaired Individuals 2024

- Engineered an IoT-based wearable assistive device using Arduino microcontrollers and ultrasonic sensors, achieving 95% obstacle detection accuracy to enhance independent mobility and user safety.
- Received national recognition at multiple innovation events, including 1st Prize, Runner-Up, and Top 6 Finalist honors at the Vishwakarma Awards hosted at IIT Hyderabad, competing among 3,000+ teams.

INTERNSHIP EXPERIENCE

- UI/UX Design Intern – Sri Nandha Infotech2025
- Designed 10+ responsive UI screens using Figma and Canva, adhering to industry-standard design principles for usability, accessibility, and visual consistency.
 - Collaborated cross-functionally with development and product teams to deliver production-ready interface designs within project timelines.

Tools Used: Figma, Canva

AREA OF INTEREST

- Full-Stack Development
- Software Engineering
- Artificial Intelligence & Machine Learning
- Internet of Things (IoT)
- Computer Networks

TECHNICAL SKILLS

Languages: Java, JavaScript
Frontend: React.js, HTML5, CSS3, Bootstrap
Backend: Node.js, Express.js, Flask
Databases: MongoDB, MySQL, PostgreSQL, Supabase
Tools & Platforms: Git, GitHub, VS Code, Figma, Canva, Streamlit
Concepts: REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Agile Methodology, IoT Systems, Machine Learning.

CERTIFICATIONS

Introduction To Internet Of Things	<u>NPTEL</u>	2025
Agile Methodologies	<u>Techcanvass</u>	2025
Java Programming	<u>Great learning</u>	2024

PUBLICATIONS & CO-CURRICULAR ACTIVITES

- Led a team in presenting the research paper titled "Enhancing Sign Language Recognition and Translation with Machine Learning" at the 2nd International Conference hosted by London American City College.
- Led the development and presentation of an IoT project at the Paper Presentation Competition, BIT Engineering College, showcasing the Smart IoT system to academic and industry evaluators.
- Led the team during Paper and Project Presentation events at Kongu Engineering College, demonstrating technical expertise, innovation, and leadership in competitive academic forums.
- Participated in the Coding Contest at Coimbatore Institute of Technology (CIT), sharpening algorithmic thinking and problem-solving proficiency under timed conditions.
- Served as Team Leader during the 24-hour Odoo Hackathon Final Round, guiding the design and development of innovative software solutions for real-world challenges in a high-pressure competitive environment.

ACHIEVEMENTS & COMPETITIVE PROFILE

LeetCode:	Maximum Rating 1,462 3 Badges 500+ Problems Solved
HackerRank:	100+ Problems Solved 3+ Skill Certificates
Vishwakarma Awards 2024:	Top 6 Finalist among 3,000+ national teams (IIT Hyderabad)
Paper Presentation:	Led the team and Winner among 800+ teams at Kongu Engineering College; Runner-Up among 100+ teams at Coimbatore Institute of Technology (CIT)
